

## **Notice for INFRACON Clients**

1. Tender End Date is not getting updated simultaneously on INFRACON portal when the Corrigendum is uploaded on e-procurement portal about extension of Proposal Due Date.
2. INFRACON Admin. may be approached to extend the End Tender Date only when the same has been overlooked inadvertently.
3. It may be noted that INFRACON Admin. shall not be considering any request for editing End Tender Date in the following circumstances:
  - a) When the time left in the Bid Due Date is less than 7 days.
  - b) When the "Move Data" option has already been exercised by Client.

In view of the above, all the Client Users are again requested to ensure going for "Move Data" immediately after the closing of End Tender Date & Time. It is further clarified that End Tender Date is the last date for submission of proposal & not the date of opening of proposal.
